Subject: Update, Friday Morning, 10/30/2015 --- RE: DEQ letter on Gunderson's status of interim measure completion

Good morning,

We expect to be at least 98% complete today and we may finish placing all of the rock today. Thanks again for everyone's help. Please let me know if you have any questions.

Best regards,

Dave Harvey

Subject: Re: DEQ letter on Gunderson's status of interim measure completion

Good afternoon/evening,

I thought everyone would be interested in a quick update. We commenced placement of the rock at the toe of the slope today and will continue the work through this week.

Best regards,

Dave Harvey

Hi Dave.

Michael LaDouceur notified me that he was able to issue the USACE permit yesterday. Thank you for the communications during final permitting last week ensuring that you have been moving forward with preparations to complete the work as soon as possible.

As we discussed, I put together the attached letter detailing DEQ's understanding of the timing of completion of all interim measures, to confirm we are on the same page. I trust you will find this is just good communication on my part and continuing DEQ's approach as "tough, but fair" as you requested in

our first meeting with me as PM. I hope it also helps us keep the progress you have been making at the site moving forward and on agreed to schedules, which we also agreed to work together to improve. Let me know if you would like to talk about this further. I look forward to seeing the bank work in action and meeting on the next pieces that are coming together.
